

# STRUCTURAL TRIANGLE PARTS

CUT FOR 6 HOMES (12 triangles)

Cut these (rough) lengths of 2x4, and place them on a yellow cart.

| Quantity | Label | Length              | Notes      |
|----------|-------|---------------------|------------|
| 12       | B     | 89 5/8"             | Use 8' 2x4 |
| 12       | A     | 96" (no cut needed) | Use 8' 2x4 |

Using the green chop saw and jig (set up for 18.5° angle cuts), trim both ends of these. The longer one is used below for A pieces

Set the (red) back chop saw to an 18.5° angle, and trim the following, setting each 2x4 on the saw table standing on its shortest edge:

| Quantity | Label | Length                             | Notes                                                                                                                         |
|----------|-------|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| 24       | A     | 41"                                | Cut two pieces from each blank, being sure that the long point previously cut is against the back rail and even with the stop |
| 24       | D     | 6- <sup>3</sup> / <sub>16</sub> "  | From scraps or 12" scrap blocks                                                                                               |
| 24       | E     | 11- <sup>9</sup> / <sub>16</sub> " | From 12" blocks                                                                                                               |

Set the back chop saw back to 0°. Cut

| Quantity | Label | Length                             | Notes                                         |
|----------|-------|------------------------------------|-----------------------------------------------|
| 12       | C     | 11- <sup>5</sup> / <sub>16</sub> " | Use 12" scrap blocks                          |
| 24       | E     | 11- <sup>5</sup> / <sub>16</sub> " | Cut the tip off the slanted end of each piece |
